CALIFORNIA PUBLIC FINANCE AUTHORITY

DATE:	NOVEMBER 7, 2023
APPLICANT:	TPI-HOLLOWAY METALS RECOVERY, LLC
AMOUNT:	UP TO \$150 MILLION OF REVENUE BONDS
PURPOSE:	FINANCE OR REIMBURSE THE COSTS OF THE ACQUISITION, CONSTRUCTION, IMPROVEMENT, EQUIPPING, AND CERTAIN RELATED COSTS OF A SOLID WASTE RECYCLING FACILITY
PRIMARY ACTIVITY:	SOLID WASTE RECYCLING

Background:

TPI-Holloway Metals Recovery, LLC (the “Borrower”) is a Delaware limited liability company. TPI-Holloway Metals Recovery Pledgor, LLC (the “Parent”), a Delaware limited liability company, owns 100% of the equity interests of the Borrower. The Parent is a holding company and has no assets other than the equity interests of the Borrower. The Parent is owned indirectly by TPI-Holloway Metals Recovery HoldCo, LLC, a 50/50 joint venture between Tompaul California LLC, a California limited liability company (“TCL”) and Holloway Metals Recovery, LLC, a Wyoming limited liability company (“HMR”).

The proceeds of the Series 2023 Bonds will be loaned to the Borrower primarily to finance a project (the “Project”) consisting of the acquisition, design, construction and equipping of an automotive shredder residue (“ASR”) processing and recycling facility in Lost Hills, California (the “Facility”). The Borrower will lease the Project site where the Facility will be located from Lost Hills Environmental, LLC, a Wyoming limited liability company and subsidiary of HMR (“LHE”) under a long-term lease agreement (the “Lease”). The Lease will be assignable to the Trustee, and the Borrower will have title to the physical plant and equipment it constructs and installs on the Project site that will constitute the Facility. The Facility will receive ASR from LHE, which has two cells of monofill landfill primarily containing ASR next to the Facility (collectively, the “Lost Hills Landfill”). It is also expected that Holloway Environmental Solutions, LLC, a Wyoming limited liability company and subsidiary of HMR (“HES”) will supply ASR to the Facility from regional shredding facilities under various feedstock agreements.

The Lost Hills Landfill currently contains roughly two (2) million tons of ASR that has been accumulated over nearly 25 years. The two (2) million tons of Landfill ASR as well as daily intake of ASR will be contributed at no cost to the Borrower. The Borrower will also avoid paying future landfill costs, exclusive of fuel costs, by depositing the waste (i.e. the residual material that are not metals or otherwise sellable commodities from processing the ASR through the Project) back into the Lost Hills Landfill so long as

space remains in the two (2) cells of the Lost Hills Landfill, which at current rates is expected to be at least ten plus (10+) years.

The primary source of incremental feedstock for the Project is expected to come from SA Recycling, which operates (a) a shredding facility in Bakersfield, California approximately 45 miles from the Project site, (b) a shredding facility in Terminal Island, Los Angeles, California approximately 175 miles from the Project site and (c) a shredding facility in Anaheim, California approximately 180 miles from the Project site. SA Recycling currently provides on average 150,000 to 200,000 tons of ASR to the Lost Hills Landfill annually. The Borrower may also seek other regional suppliers to direct their waste streams consisting of shredded car parts and other scrap metal to the facility for processing and recycling.

The Borrower, through a back-to-back incentive structure governed by HES and LHE, could potentially incentivize other suppliers by offering reduced or waived tipping fees for providing waste for processing. The Borrower will then take this discarded ASR material and further process the ASR by separating the ferrous and non-ferrous metals from the other materials found in the ASR. ASR is a waste stream consisting of shredded car parts and other scrap metal. ASR contains approximately 10% by volume of commercial value non-ferrous metal (such as copper, aluminum, and stainless steel). The Borrower will take ASR and process it by using technology licensed to the Borrower to extract commercial value non-ferrous metal, such as copper, aluminum and stainless steel, from the ASR.

Description of Proposed Project:

The Borrower is seeking up to approximately \$150 million federally tax-exempt bonds, designated as the “California Public Finance Authority Solid Waste Disposal Revenue Bonds (TPI-Holloway Lost Hills Recycling Project) Tax-Exempt (AMT) Series 2023 (Green Bonds). The proceeds from the sale of the Series 2023 Bonds, as loaned by the Issuer to the Borrower under the Loan Agreement, will be used by the Borrower (a) to finance a substantial part of the cost of the acquisition, design, construction and equipping of the Project; (b) to fund thirty (30) months of interest on the Series 2023 Bonds following their date of issuance; (c) to fund a debt service reserve fund for the Series 2023 Bonds; and (d) to fund a portion of the costs of issuance of the Series 2023 Bonds. The Borrower will use equity proceeds to pay costs of issuance of the Series 2023 Bonds to the extent not paid with proceeds of the Series 2023 Bonds and to finance working capital.

TEFRA Information:

A TEFRA hearing was held by Kings County on October 24, 2023 and was approved. A TEFRA hearing is scheduled in Kern County on November 7, 2023.

Financing Structure:

California Public Finance Authority Solid Waste Disposal Revenue Bonds (TPI-Holloway Lost Hills Recycling Project) Tax-Exempt (AMT) Series 2023 (Green Bonds) (the “Series 2023 Bonds” or the “Bonds”). The Series 2023 Bonds will be senior secured fixed rate bonds issued under the Indenture (as defined below). The proceeds from the sale of the Series 2023 Bonds shall be loaned to the Borrower pursuant to the Loan Agreement. The Series 2023 Bonds will be sold to institutional investors issued in minimum denominations of \$100,000 and in integral multiples of \$5,000 in excess thereof. Interest on the

Series 2023 Bonds will be excludable for federal income tax purposes. The financing will comply with California Public Finance Authority’s issuance policies.

Recommendations:

Based on the overall Project public benefit detailed on Attachment 1, it is recommended that the Board of Directors approve the Resolution as submitted to the Board, which:

1. Approves the issuance of the Bonds;
2. Approves all necessary actions and documents for the financing; and
3. Authorizes any member of the Board or authorized signatory to sign all necessary documents.

Attachment 1

The Project provides many economic benefits for Kern County. The Project Sponsor will create approximately 30 jobs during construction and 50 permanent jobs for residents in the surrounding areas.

There are a number of environmental benefits as well. The Project Sponsor's technology efficiently extracts commodities, emitting less pollution than traditional mining practices. This not only contributes to the circular economy by preserving natural resources, but also reduces waste and harmful pollutants. Some of the benefits of this Project include:

- The design of the separation technology is a closed loop water-based system that employs electric motors on many of its components, greatly reducing air emissions compared to dry separation. Thus, dust, diesel motor emissions, and other greenhouse gas emissions are reduced by over 80% compared to traditional copper and alumina mining. The beneficial environmental factors mentioned here and below are projected for the Lost Hills project based on actual processes and results at the Project Sponsor's related facilities.
- Because the material the Project Sponsor is mining is between 2 and 3 percent copper, and between 3 and 4 percent aluminum, it processes fewer tons of infeed to recover the same amount of these metals than a traditional mining operation processes. Copper ore and aluminum are recovered at less than 1% in traditional mines, making the Project Sponsor 3-4x more efficient in its use of fuel and power.
- The plant is designed to separate stormwater and process water. The process water is recovered using several means, such as filter presses, screw presses, and the like, then it is sent through a closed loop clarifying system for re-use. This will significantly mitigate water quality impact. In addition, because the technology recovers well over 99% of heavy metals in automotive shredded residue (ASR), the Project Sponsor greatly reduces the risk of groundwater contamination.
- The Project Sponsor will recycle primarily copper, aluminum, stainless steel, and precious metals that would otherwise be sent to a landfill. The Project Sponsor will sort these metals into a smelter-ready product so that they can be reused in many industries.
- The Holloway Group, a partner in this venture, which owns and manages the landfill where the project will be located, is in the business of solid waste disposal and has a strong track record in complying with California's regulations regarding solid waste.
- The disposal of non-recyclables upon the recovery of metals, combined with the sorting of these materials in water, results in most of the generated waste passing a TCLP test (known as a toxicity characteristic leaching procedure test) for hazardous waste. Most ASR does not pass the TCLP test prior to the Project Sponsor's processing of it.
- Metals recovery averages 12-15% of the weight and volume of the ASR, reducing landfill usage by a like amount. For example, the project will process approximately 550,000-700,000 tons of ASR annually, which will recycle, and thus remove, approximately 66,000-105,000 tons of metals annually.
